E-COMMERCE CATEGORY HIERARCHY

Developer handoff document • Indian gifting store

01 HAMPERS

02 STATIONERY

03 PERSONALISED GIFTS

Purpose

This document defines the planned category and subcategory structure for customer-facing navigation and admin-panel category management. Actual products have not been selected yet and should be added later.

Key decisions

- Three main categories: Hampers, Stationery and Personalised Gifts.
- Three category levels: Main Category → Subcategory → Child Category. Products will be added later.
- Prioritise durable, non-perishable products; avoid food and short-shelf-life goods.
- “Create Your Own Combo” can combine eligible products from any of the three main categories.

1. How the hierarchy works

Use the same three-level structure across the catalogue. Products, SKUs, pricing and stock are deliberately outside the current scope.

LEVEL	MEANING	EXAMPLE
Level 1 — Main category	Top-level section in website navigation.	Hampers
Level 2 — Subcategory	Major grouping within a main category.	Birthday Hampers
Level 3 — Child category	More specific grouping under a subcategory.	For Her
Products — later	Actual items, variants, prices and inventory.	To be decided

Important implementation note

“Create Your Own Combo” is a category entry point and configurable bundle feature. Do not create a separate product record for every possible combination. Store the selected products, quantities and personalisation details with the cart/order.

Suggested category fields

FIELD	PURPOSE
category_id	Unique ID
name	Display name
slug	URL-friendly identifier
parent_category_id	Parent ID; null for main categories
description	Optional category introduction
image	Optional thumbnail/banner
display_order	Sort order in menus
is_active	Show/hide category

HAMPERS — category tree

Gift collections grouped by occasion, recipient or purpose. Use durable, non-perishable contents only.

HAMPERS

1. Birthday Hampers

- For Her
- For Him
- For Kids
- For Friends
- For Couples

2. Festival Hampers

- Diwali Hampers
- Raksha Bandhan Hampers
- Christmas Hampers
- New Year Hampers
- Holi Hampers
- Other Festival Hampers

3. Wedding & Engagement Hampers

- Wedding Hampers
- Engagement Hampers
- Bridal Hampers
- Groom Hampers
- Bridesmaid Hampers
- Wedding Return Gifts

- ■■■ Personalised Birthday Combo
- ■■■ Personalised Anniversary Combo
- ■■■ Personalised Couple Combo
- ■■■ Personalised Friendship Combo
- ■■■ Personalised Wedding Combo
- ■■■ Personalised Corporate Combo
- ■■■ Custom Occasion Combo

2. Create Your Own Combo — Requirements

Customers should be able to build a gift combo using eligible products from Hampers, Stationery and Personalised Gifts. Product-level eligibility and customisation rules will be configured later.

STEP	CUSTOMER ACTION	DEVELOPER EXPECTATION
1	Choose an occasion or start from scratch	Offer occasion-based starting points and a build-your-own flow.
2	Select items	Allow eligible items from all three categories; check stock and rules.
3	Personalise items	Show only supported fields: name, text, photo, colour or design.
4	Choose packaging/card	Offer enabled gift box, wrapping, ribbon or card options.
5	Review combo	Show selected items, customisation summary, price breakdown and total.
6	Add to cart	Store item IDs, quantities, customisation values and price snapshot.

Admin panel should support

Category management	Create/edit categories, assign parent, set slug, description, image, display order and active status.
Product-category mapping	Let a product appear in multiple relevant categories without duplicating the product record.
Personalisation settings	Configure fields such as name, message, photo, design and colour per eligible product.
Combo eligibility	Choose which products can be added to combos and optional quantity limits.
Combo pricing	Calculate selected item prices plus personalisation and packaging charges.
Combo order details	Save the exact selected items, quantities and customisation values for fulfilment.

3. General Rules & Acceptance Checklist

Products are not decided yet
Implement categories only at this stage. Product records, SKUs, pricing and inventory will be populated later.

Non-perishable assortment
Avoid food, fresh flowers and short-shelf-life consumables. Check storage and durability for other goods.

No duplicate product records
A product may appear in several categories or occasion collections while sharing one inventory record.

Keep category depth consistent
Use Level 1 main category, Level 2 subcategory and Level 3 child category.

Category visibility
Admin users should be able to activate/deactivate categories and set their display order.

Empty categories
Allow categories to exist before products are added; hide or mark empty categories according to storefront rules.

Combos are configurable bundles
Do not pre-create every possible combination as a product. Save each customer's chosen combination with the order.

Handoff status: Category hierarchy defined; products and suppliers remain undecided.
